Start-Up Guide

Typing Pal overview for teachers

TypingPal

SCHOOL EDITION

Easy home or school access

Use your school's Custom URL (e.g. https://my-school.typingpal.com). You and your students can then go directly to Typing Pal from your school's login page. See User Guide. ↗

🔴 🟡 🟢 〈 〉 🔒 https://my-school.typingpal.com
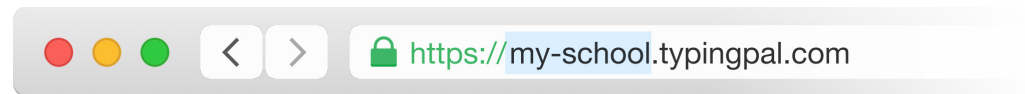

From the login page, enter your credentials using your Typing Pal, Google, Microsoft, or Clever account. See User Guide. ↗

Log in with a Typing Pal account

Three ways to create an account

Self-registration

Your students can easily create their own Typing Pal accounts using the school's subscription code. See User Guide. ⬈

Manual addition

Has an extra student joined your class during the year? Quickly add the new student by manually filling out an online form. See User Guide. ⬈

Account Creation by Import

Ask your administrator to create all the Typing Pal student accounts for your school by importing an Excel or CSV file. See User Guide. ⬈

For all grade levels

Ages 6 to 11

Ages 12 to 16

Ages 17 and over

The working environment in Typing Pal is visually appropriate for all ages. However, you have the option to specify the age group of your students so that the content they see is tailored accordingly.

A different icon for each activity type

Exercise

jf
Exercise 1

The exercises gradually introduce new keys.

Drills

ing
Drill 2

In these activities, students type some of the most common character sequences in English multiple times.

Words

Words 2
Review

This type of activity uses words composed solely of letters already practiced in the exercises.

Texts

The Arctic Fow

Typing Pal texts include words and complete sentences. Their themes and levels of difficulty are adapted to the students' age.

Tests at the end of each step

Test 2
Review

The tests recap all the keys introduced in the step just completed.

Activity statuses

Activity completed perfectly (objectives achieved, no errors)
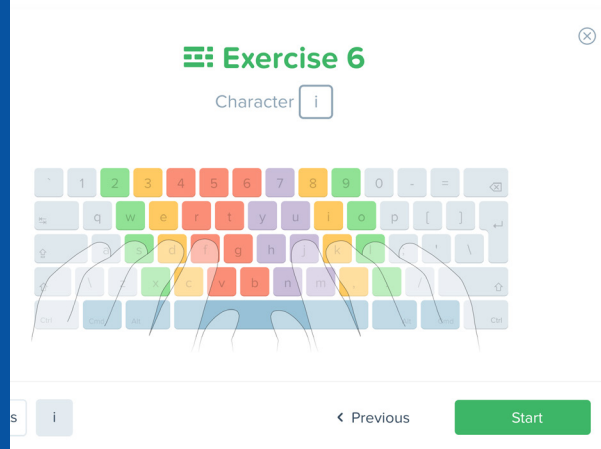

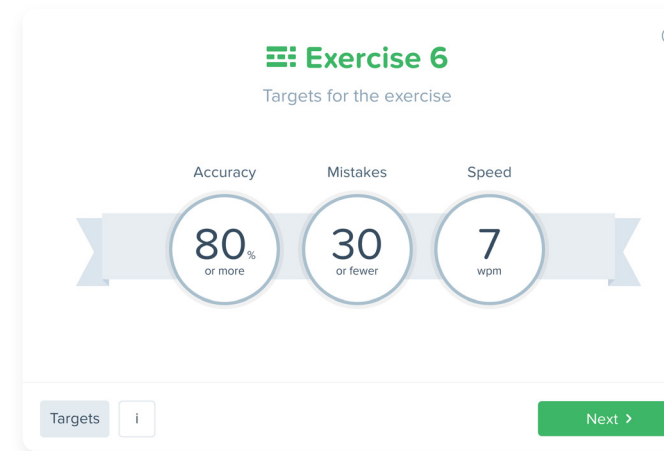

Activity completed successfully (objectives achieved)

Activity to be completed

Introducing targets and characters

At the beginning of an exercise or test, Typing Pal indicates the targets for accuracy, errors, and typing speed.

New characters and the fingers used for each one are also introduced. This allows your students to familiarize themselves with the correct typing technique.

Students can then practice typing character or word sequences until they achieve the targets.
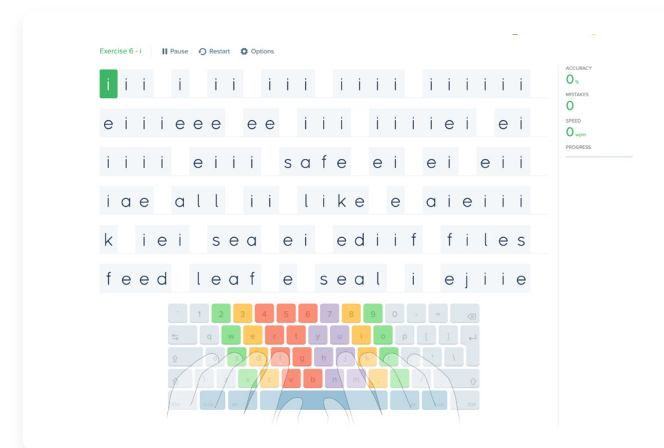

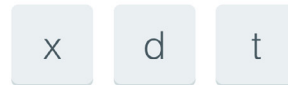

Tailored activities

Thanks to its algorithm, Typing Pal offers each student personalized improvement activities targeting the characters or fingers that need more practice. Your students can choose to work on their speed, accuracy, or both, by typing letter sequences designed especially for them.
Improvement

🎯 Improve my **accuracy**

Improve least accurate **characters**

Improve least accurate **fingers**
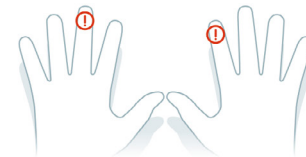

🕐 Improve my **speed**

Improve slowest **characters**

Improve slowest **fingers**

😀 Improve **both**

Improve weakest **characters**

Improve weakest **fingers**

Collect them all!

Encourage your students to collect badges. They will receive a badge when they complete different Typing Pal challenges.

Progress badges

Progress badges encourage the students to complete all the activities.

Performance badges

Performance badges encourage the students to excel to the highest levels of keyboard mastery.

Mystery badges

The 10 mystery badges encourage the students to explore Typing Pal and try out all of its features.

Stimulating educational games

Playing is a great way to learn! Typing Pal's games offer your students playful and varied learning activities to improve their typing skills by targeting different areas of the keyboard.

Cosmik Ball

Students help the space octopus by typing individual characters, forming a protective shield around a dangerous cosmic ball.
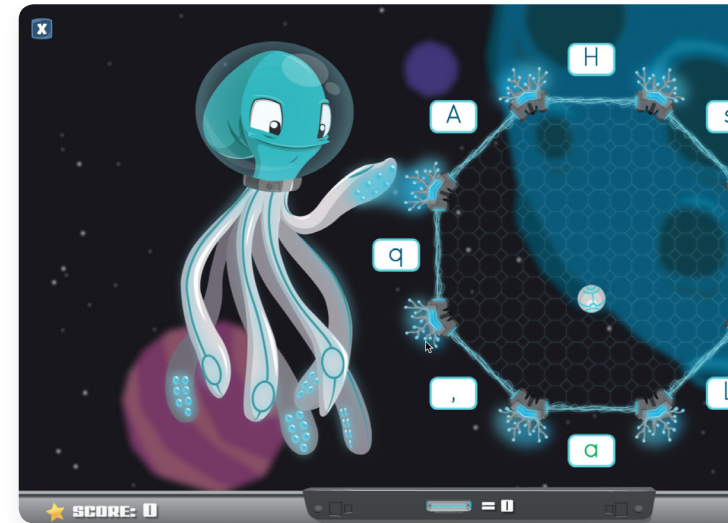

Monkeys in Jeopardy

Your students will have fun typing the correct characters to save the monkeys threatened by the storm.

Advanced statistical reports

Exporting detailed statistics

Export detailed statistical reports on your students' performance in order to evaluate them.
See User Guide.

Student activity log

Access video replays to diagnose a student's difficulties or to understand an unusual result.
See User Guide.

Reports for parents

Generate a summary report of your students' performance that can be sent to their parents.
See User Guide.

Personalized training adapted to students' needs

Adapted targets

Choose the most appropriate speed targets for your group based on their age or training program.

Personalized texts

Add texts that you or your students have written to the existing text collection in Typing Pal. See User Guide. ↗

Questions or comments?

Consult the **User Guide** to discover all of Typing Pal's advanced features.

If you can't find the answer to your problem, contact our expert technicians using the **form**.

Share your comments or suggestions for improvements by emailing **suggestions@typingpal.com**.
